PROFILE SUMMARY

I am an alumnus of the International Islamic University Malaysia (IIUM), holding a Bachelor's degree in Computer Science with a **major in Software Engineering** and a CGPA of **3.78**. I am also an alumnus of the Yayasan Khazanah Scholarship, and a **former backend engineer** at Payments Network Malaysia Sdn. Bhd. (PayNet). I am pursuing a career in the **software engineering industry**, with a strong focus on **backend development**.

WORK EXPERIENCE

Backend Engineer (Internship)
Mar 2025 – Aug 2025

Payments Network Malaysia Sdn Bhd (PayNet)•Bangsar

- Built and optimized RESTful APIs, ensuring secure, efficient data exchange and contributing to on-time feature delivery.
- Collaborated closely with developers, Quality Assurance (QA) engineers, and product teams to align requirements, resolve blockers, and maintain smooth workflows.

Backend Engineer
Oct 2025 – Sep 2026

Payments Network Malaysia Sdn Bhd (PayNet)•Bangsar

- Developed and maintained Java-based RESTful backend services that replaced an outsourced solution (TestRail), reducing troubleshooting effort by approximately 40% while improving system maintainability and operational efficiency.
- Led the backend development of two internal participant onboarding applications, streamlining workflows and significantly reducing onboarding turnaround time from months to a substantially shorter process.
- Configured AWS CI/CD deployment pipelines for containerized backend applications by publishing Docker images to a centralized AWS ECR repository and automating deployments to AWS ECS using Blue/Green deployment strategies, enabling reliable production releases with minimal downtime.
- Enhanced and maintained two system simulators used by participants to validate technical and operational requirements, improving onboarding readiness by approximately 30%.

EDUCATION

Centre Foundation Studies (CFS) IIUM, Gambang, Pahang
Aug 2020–Jun 2021

Engineering and Computer Science | Foundation
GPA: 3.69

International Islamic University of Malaysia (IIUM), Gombak, Selangor
Oct 2021–Jul 2025

Software Engineering | Bachelor of Computer Science
GPA: 3.78

SKILLS

Language
Malay, English

Soft
Leadership, Communication, Team Management, Program Management, Time Management, Adaptability

Technical
Java, Python, HTML, CSS, JavaScript, C++, Git, Postman, PostgreSQL, Spring Boot, Maven, MongoDB, Flutter, Figma, AWS ECS, AWS EC2 ,AWS S3, FastAPI, React.js

PROJECTS

Backend Engineer
Test Management System (Internal TestRail Replacement)

- Configured CI/CD deployment pipelines for containerized applications on AWS by building Docker images and publishing them to AWS ECR, then deploying to AWS ECS using Blue/Green deployment strategies, enabling safer and more reliable production releases.
- Developed and maintained a backend system using Spring Boot and RESTful APIs, replacing an outsourced service. Strengthened coding and collaboration skills while supporting integration with frontend components. The system reduced reliance on external services, lowering operational costs by ~30% and enabling real-time troubleshooting, improving overall efficiency.

Backend Engineer
Simulators

- Managed a simulator supporting 3 different products, enabling PayNet participants to onboard automatically instead of manually. Configured multiple scenario-based behaviors to help participants understand expected system responses, resulting in faster, smoother onboarding and reduced database congestion.
- Addressed and resolved technical issues for multiple participants, explaining system behaviors, guiding them through onboarding steps, and coordinating with team members. This strengthened my communication, problem-solving, and troubleshooting skills, improving issue resolution efficiency by approximately 30%.

ACADEMIC PROJECTS

Shuttle Bus Tracking App | *Final Year Project* Present

- Created an innovative shuttle bus tracking app utilizing Dart and the Flutter framework alongside IoT GPS integration, resulting in optimized route suggestions based on feedback from over 50 users achieving a high satisfaction rate of 90%.

ACTIVITIES AND INVOLVEMENTS

- Volunteered as Mentor for PayHack (PayNet's Hackathon)
- Participated in I-Hax (National Level Hackathon)
- Program Manager of Kuliyyah of Information and Technology (KICT) Food Truck Festival
- Program Coordinator of ICT Student Society (ICTSS) Election
- Program Coordinator of KICT Annual General Meeting (AGM)
- Representative of KICT as player in football team at University Level
- Representative of IIUM in STEM It Right at the National Level

CERTIFICATIONS AND TRAINING

HTML Course Certificate 2022
Sololearn

CSS Course Certificate 2022
Sololearn

Javascript Course Certificate 2022
Sololearn

Intermediate Python Course Certificate 2023
DataCamp

AWARDS

Dean's List
Achieved Dean's List for 7 out of 8 semesters during degree.

Silver Medal of University Level Football Competition 2023
Representative of KICT as player in football team at University Level

I-Hax (National Level Hackathon) 2023
Achieved 12th Place in I-Hax
